Proposal ID 6995
Submitted On Sep 7 2018 12:41AM
Title Lockpick Village

Proposal Info

Abstract/Description The sport of lockpicking has long been a past time for kids and adults alike. Very popular in many European countries, locksport encourages participants to develop a tactical understanding of puzzles, to use their hands and to develop strong spacial reasoning. The village concept is that individuals can come in, watch a basic introduction and start with some basic introductory locks. The communal nature of the event is people sit down and learn from each other how the sport works and most can quickly become successful in opening basic locks. The content provided follows that of TOOOL which is an internationally based non-profit organization which helps promote the sport and has local clubs around the world.

Additional Info

Have you spoken on this topic before?
Yes
If so, when and where?
NTM RG 2018
Have you given this program at previous AGs?
No
If so, when was the last time
Audio/Video Requirements
Screen,Projector
First Preferred Date
No Preference
First Preferred Time For First Date
No Preference
Second Preferred Time For First Date
No Preference
Second Prefered Date
No Preference
First Preferred Time For Second Date
No preference
Second Preferred Time For Second Date
No preference
Special Instructions
This would most likely be a longer term table in a SecSIG room that would work with the Raspberry PI Workshop. The actual space is quite small, but the gear and training aspects of it require for it to be attended.

Submitter

Submitter Name	Mr. Bill Weber
Email	billweber.mensa@gmail.com
Phone	617-910-0379
